

**NCMRWF Reanalysis Data Service Webportal Version 0.2 as on
18-Oct-2023**

IMDAA - Known Issues

1. IMDAA starts from 06 UTC - 01 January 1979
2. Pressure level variables are available at 18 levels till 19th January 1982, and afterwards at 24 levels
3. Pressure level variables are available at 6-hourly intervals till 19th January 1982, and afterwards at 3-hourly intervals.
4. Vertical Velocity at pressure level variable is not available through the entire period of IMDAA (we are working on this issue and it will be available soon).
5. Surface roughness (SFCR-sfc) variable is available at only 6 hourly intervals
6. For the data continuity from 1 January 2021, IMDAA-like products from NCMRWF Global Model are disseminated through Reanalysis Portal. IMDAA-like pressure level variables are available at 18 levels.

NGFS - Known Issues

1. NGFS starts from 06 UTC - 01 January 1999
2. VVEL_prl, and ICIP_prl variables are available only 37 pressure levels (100 mb to 1000 mb), O3MR_prl variable is available only 18 pressure levels (1 mb to 300 mb). Rest of the variables are available at 47 pressure levels (1 mb to 1000 mb).

For any other issue with data, users may report to datasupport@ncmrwf.gov.in

This page will be updated in the future if required.
